

Guidelines for Giving Input

IMPORTANT RULES BEFORE STARTING

1. Keep one record per row.
2. No blank rows inside the designated areas of the template.
4. Use consistent IDs of your choosing across sheets.

There are 5 sheets in the given excel template:

1. Room.
2. Time.
3. Student.
4. Faculty.
5. Subject.

1) ROOMS SHEET

Purpose: List all rooms available.

Required Columns:

- RoomCode (H202, LAB_A1)
- Type (Theory/Lab)
- Subject for Lab

Example:

D303	Theory
H104	Lab

2) TIME SHEET

Purpose: Define timeslots.

Required Columns:

- Index (1, 2, 3...)
- Slot (08:30-09:25

Example: 1 | 08:30–09:25

2 | 09:30–10:25

3) STUDENT SHEET

Purpose: List batches/groups.

Required Columns:

- Batch (FY_A, TY_B)
- Program type (Theory/Lab)

Example: SY_D4 | Lab

SY_E | Theory

4) FACULTY SHEET

Purpose: List faculty details.

Required Columns:

- FacultyID/ Name of faculty (F1, F2)
- Course name
- Course code
- Batch
- Theory(Hours/Week)
- Lab(Hours/Week)
- Total workingload of that faculty

Example:

Name of Faculty	Course Code	Course Name	Batch	Theory (Hours/week)	Lab(Hours/Week)	Hours
F1	2301101T	Calculus and Differential Equation	CS1	3	0	7
	2301101L	CDE Tutorial	CS1-A	0	1	
	2301101L	CDE Tutorial	CS1-B	0	1	
	2301101L	CDE Tutorial	CS2-C	0	1	
	2301101L	CDE Tutorial	CS2-D	0	1	

5) SUBJECT SHEET

Purpose: Define subjects.

Required Columns:

- Course Type(PCC, OE)
- Course code
- Name (Data Structure)
- Hours/Week according to lab and Theory
- Credit for that subject.

Example:

Type	Course code	Name	Hours/Week		Credit
			Theory	Lab	
PCC	24010T	Data Structures	3	0	3
PCC	24010L	Programming Lab	0	4	2
